Hong Kong Pediatric & Adolescent Dermatology Society**

# HONG KONG DERMATOLOGY SYMPOSIUM 2023

## Welcome Message

This Symposium serves to bring together academicians and specialists of different subspecialties who all share a common interest in skin and sexually transmitted diseases.

Over the past 18 years, our function has gained recognition and popularity in the medical field. It is now a major annual event in the local community. Each year, the Symposium attracts well over 300 participants.

This year, we are very glad to have several specialists in other fields to share with us their expertise. They are microbiologist Dr. Tong KC NG, who will update us on Monkeypox; Cellular and Anatomical pathologist Dr. Joshua LI who will enlighten us on Diagnostic techniques in diagnosing cutaneous lymphoma; pediatrician Dr. David LUK will share his experience with us in managing cutaneous emergencies in children; clinical oncologist Dr. Alex KC LEUNG will elaborate on the management of melanoma; podiatrist Ms. Sarah Tse will discuss with us various foot problems facing podiatrists; Dr. Dicky WS Chung, psychiatrist, will teach us how to distinguish body dysmorphic disorders.

Among local dermatologists, I am very much indebted to Dr. Gavin CHAN, Dr. IP Fong Ching, Dr. CHAN Yung, Dr. William NGAN and Dr. Martin CHUNG who kindly share their experience with us in the management of various common and important skin diseases. The titles of their talk are listed in the scientific program. I would also like to express my gratitude to Dr. HO King Man, Dr. CHAN Hau Ngan, Dr. Dominic LAI and Dr. WONG Hing Wing for their help in chairing the sessions.

Finally I would like to thank our sponsors as well as the audience who have been supporting this function all these years and contributed to its success.

I wish you to enjoy the meeting and learn some useful knowledge for your daily practice.

Dr. LUK Nai Ming,

## Scientific Program (22 October 2023 Sunday)

| Time  | Program  | Faculty            |
