HONG KONG DERMATOLOGY SYMPOSIUM 2024

Welcome Message

This Symposium, now in its 20th year, has become a significant annual event in the local medical calendar, attracting over 200 participants from various medical backgrounds. It serves as a unique platform for academicians and specialists to gather and discuss skin and sexually transmitted diseases. Over the years, its popularity and recognition have grown, making it a must-attend event for medical professionals.

This year's Symposium is no exception, with an array of esteemed speakers sharing their expertise. We are delighted to have Dr. Tong KC NG, a microbiologist, updating us on the laboratory diagnosis of Syphilis. Similarly, Dr. LUK Ho Ming, a clinical geneticist, will enlighten us on the clinical application of Genomic Medicine in Dermatology. For pediatricians, Dr. David LUK will share his insights on managing blistering disorders in children.

Moreover, we are honored to have Dr. Ariel CS CHEONG from Macau and Prof. CHUNG Men Hung from Chang Gung Hospital, Taipei, joining us this year. Dr. CHEONG will elaborate on patch tests in cutaneous drug eruptions, while Prof. CHUNG will provide an update on severe cutaneous adverse reactions.

Locally, we are indebted to Dr. Steven KF Loo, Dr. Shirley W Chan, Dr. Michelle CS LO, Dr. William YM TANG, and Dr. Dominic YK LAI for sharing their experiences in managing various common and important skin diseases. We also express our gratitude to Dr. NG Shun Chin, Dr. KWAN Chi Keung, and Dr. Christina SM WONG for chairing the sessions.

Finally, we would like to thank our sponsors and the audience for their continuous support and contributions to the Symposium's success. We hope that you will enjoy the meeting and gain valuable knowledge that can be applied in your daily practice.

Scientific Program (3 November 2024 Sunday)

Time	Program	Faculty
